## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a method, process or system for calculating the reciprocal square root of a number via a mathematical algorithm. The claims are not limited to a practical application of the mathematical algorithm because the reciprocal square root result is not a useful, concrete and tangible result. More specifically the result is not a tangible result because it is not a real-world result.

Relative to applicants' remarks, third paragraph on page 6, the referenced "rounding", "compute", "multiplying" and "adding" are all operations that are involved in computing the reciprocal square root of a number. Also while the result may be useful it is not tangible because it is not a real-world result i.e. contrary to State Street which involved computing data relating to share prices the mere computation of the reciprocal square root of a number is not a practical application.

The claims are also direct to a program per se. While the program contains functionally descriptive material the recording of the functionally descriptive material on some computer-readable medium, which would enable the functionality to be realized, fails to be recited.

***Conclusion***

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
